SUMMARY

Professional IT and Software Development Intern with hands-on experience building **responsive web applications using Angular and TypeScript** and supporting **enterprise IT infrastructure**. Proven ability to translate **Figma UI/UX designs** into high-performance interfaces, execute **manual and usability testing**, and maintain **system reliability for 100+ users**. Strong understanding of **Agile workflows**, **Git version control**, **Active Directory administration**, and **endpoint security**, with a solid foundation in troubleshooting, system uptime, and user support.

SKILLS

Frontend & Web Development:

React.js	Next.js	Angular	JavaScript	TypeScript	HTML5	CSS3	Tailwind CSS	SCSS	Material-UI
Node Js	Express Js								

Tools, IT Systems & Engineering Practices:

Git	GitHub	Postman	Figma	ESLint	Netlify	Vercel	Agile/Scrum	Unit Testing	Responsive Design
Active Directory	ESET Endpoint Security	CISCO	Network Troubleshooting						

PROFESSIONAL EXPERIENCE

10/2024 - Present	●	Senior React Developer Corpine Lab	- Engineered high-performance UIs with React.js and TypeScript, enhancing user interaction across web platforms - Minimized frontend bugs by 25% by implementing ESLint, strict type checking, and modular code structures - Led seamless RESTful API integrations using Axios, boosting data reliability and reducing latency in core features - Instituted a standardized UI framework with Material-UI, increasing visual consistency and reducing development time by 20%
03/2025 - 10/2025	●	IT & Software Development Intern AIICO INSURANCE PLC	- Developed responsive, production-ready web interfaces using Angular and TypeScript, translating complex Figma UI/UX designs into high-performance components. - Performed manual, functional, and usability testing on enterprise platforms (AIICO E-Business & Sunhive Dashboard), resolving critical UI/UX issues and ensuring cross-browser compatibility (Chrome, Edge, Firefox). - Collaborated in an Agile (Scrum) environment, participating in daily stand-ups and sprint ceremonies while using Git/GitHub for version control, branching, pull requests, and code reviews. - Managed IT infrastructure, security, and support for 100+ users using Active Directory and ESET, resolving network/hardware issues (domain setup, RJ45 cabling, UPS monitoring) and maintaining 99.9% system uptime.
03/2024 - 09/2024	●	Software Developer Manager Easycomp technologies	- Refined and maintained TypeScript-based codebases, resulting in 30% fewer runtime issues - Built scalable data dashboards using D3.js, enabling real-time business analytics for enterprise clients - Executed cross-browser compatibility and Lighthouse audits, improving performance metrics by 22%
09/2023 - 03/2024	●	React Developer Green Mouse Technologies	- Architected complex dashboard systems using React, Redux Toolkit, and Axios, improving client reporting workflows - Enhanced application security by implementing role-based access control (RBAC) - Accelerated project turnaround time by 20% through streamlined API communication and reusable service layers
02/2022 - 08/2023	●	Software Developer Easycomp technologies	- Spearheaded frontend initiatives, translating Figma designs into accessible, responsive web interfaces - Reduced legacy code dependencies by 40% through effective refactoring and component modularization - Produced dynamic data visualizations with D3.js for fintech clients, improving report accuracy and decision-making
