PROFESSIONAL SUMMARY

Senior Frontend Engineer with 5+ years building enterprise-grade web applications across insurance, fintech, and SaaS. Specialist in React, Next.js, and TypeScript with a track record of cutting frontend bugs by up to 40% and shipping velocity gains of 20%+ through design systems and modular architecture. Trusted to lead code reviews, mentor junior engineers, and own end-to-end delivery in distributed Agile teams. Builds independent products end to end, from API and database design through to deployment, and applies that same ownership mentality to optimising UI performance, integrating complex APIs, and managing IT infrastructure for 100+ users.

TECHNICAL SKILLS

Frontend: React.js, Next.js, Angular, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, SCSS, Material-UI, Redux Toolkit

Backend & APIs: Node.js, Express.js, RESTful APIs, Axios, Supabase, D3.js

Tooling & Delivery: Git, GitHub, CI/CD, Vercel, Netlify, Figma, Postman, ESLint, Lighthouse, Cursor AI

IT & Security: Active Directory, ESET Endpoint Security, RBAC, Network Troubleshooting, Hardware Support, OneDrive

Practices: Agile / Scrum, Unit Testing, Cross-browser Testing, Code Reviews, Component Architecture, Accessibility (WCAG)

PROFESSIONAL EXPERIENCE

Corpine Lab | United Kingdom (Remote)

October 2024 to Present

Senior React Developer

- Architect and ship high-performance React.js and TypeScript interfaces serving thousands of users, with a focus on accessibility, responsiveness, and load speed.
- Drove a 25% reduction in frontend bugs company-wide by championing ESLint enforcement, strict typing, and a modular component library adopted across the team.
- Led RESTful API integration using Axios. Designed error-handling patterns and retry logic that improved data reliability for core product features.
- Defined and rolled out a Material-UI design system, reducing per-feature development time by 20% and accelerating shipping velocity.
- Mentored junior developers through structured code reviews, raising overall code quality and establishing frontend best practices.

Shelf 21 | United Kingdom (Remote, Contract)

October 2025 to April 2026

Frontend Developer (6-Month Contract)

- Delivered production React.js and Next.js features with TypeScript on a fast-paced UK contract, executed in parallel with senior responsibilities at Corpine Lab.
- Translated Figma designs into pixel-accurate, accessible Tailwind CSS components, validated across Chrome, Edge, Firefox, and Safari.
- Integrated RESTful APIs with robust loading, error, and retry states, improving perceived performance and reliability for end users.
- Optimised Core Web Vitals via code-splitting, lazy loading, and image optimisation, lifting Lighthouse performance scores on key pages.
- Collaborated asynchronously with distributed product and design teams via Git pull requests, code reviews, and Agile ceremonies under tight deadlines.

AIICO Insurance PLC | Lagos, Nigeria

March 2025 to October 2025

IT & Software Development Intern

- Translated complex Figma UI/UX designs into production-ready Angular and TypeScript components for two enterprise platforms used daily by business teams.
- Resolved critical UI/UX defects through rigorous manual, functional, and usability testing across Chrome, Edge, and Firefox.

- Operated as a full Agile team member: daily stand-ups, sprint planning, retrospectives, and Git workflows including branching, pull requests, and reviews.
- Acted as sole IT administrator for 100+ staff, managing Active Directory, ESET endpoint security, RJ45 cabling, UPS monitoring, and domain configurations, achieving 99.9% uptime.

Easycomp Technologies | Lagos, Nigeria

March 2024 to September 2024

Software Developer Manager

- Led a TypeScript codebase refactor that eliminated 30% of runtime errors, improving reliability and developer confidence across the product.
- Designed and built real-time data dashboards using D3.js, enabling enterprise clients to visualise KPIs and make data-driven decisions.
- Ran Lighthouse and cross-browser audits as a regular QA process, improving performance scores by 22%.

Green Mouse Technologies | Lagos, Nigeria

September 2023 to March 2024

React Developer

- Built complex reporting dashboards with React, Redux Toolkit, and Axios, replacing a fragile legacy system and accelerating client workflows.
- Implemented role-based access control (RBAC) across the application, ensuring sensitive data was only accessible to authorised users.
- Introduced reusable service layers and API communication patterns that cut project turnaround time by 20%.

Easycomp Technologies | Lagos, Nigeria

February 2022 to August 2023

Software Developer

- Converted Figma UI designs into fully responsive, accessible web interfaces with pixel-accurate implementations.
- Reduced legacy code dependencies by 40% through systematic refactoring and component modularisation.
- Produced interactive D3.js data visualisations for fintech clients, improving reporting accuracy and financial decision-making.

Zojatech | Lagos, Nigeria

October 2021 to December 2021

Frontend Developer Intern

- Developed responsive frontend features for a banking app prototype using HTML, CSS, and JavaScript.
- Assisted in debugging, cross-device testing, and feature optimisation during Agile sprints.
- Participated in daily stand-ups and code reviews, building strong foundational engineering and collaboration habits.
